# SHAPESCAPER® weathering steel garden edging

Manufactured in Australia with BlueScope® Steel

Lengths are supplied with connector plates and fasteners. Pre-drilled holes make assembly and alignment easy. SHAPESCAPER® landscape edging is a modular steel landscaping system available in eight profile heights at 75mm, 100mm, 150mm, 185mm, 230mm, 290mm, 390mm and 590mm. All lengths are 2400mm long and the lower profiles can be shaped on site into angled bends or flowing curves. SHAPESCAPER® weathering steel garden edging is made using Redcor® from BlueScope® steel and is equivalent in specification to “corten”.

# SHAPESCAPER® ZAM® steel garden edging

Manufactured in Australia with NIPPON® Steel

Lengths are supplied with connector plates and fasteners. Pre-drilled holes make assembly and alignment easy. SHAPESCAPER® landscape edging is a modular steel landscaping system available in eight profile heights at 75mm, 100mm, 150mm, 185mm, 230mm, 290mm, 390mm and 590mm. All lengths are 2400mm long and the lower profiles can be shaped on site into angled bends or flowing curves. SHAPESCAPER® ZAM steel garden edging is made using ZAM® from NIPPON® steel. In terms of corrosion resistance, ZAM® is 10 to 20 times better than hot-dip zinc-coated steel sheets.

# SHAPESCAPER® stakes and connectors

Manufactured in Australia with BlueScope® Steel

All SHAPESCAPER® stakes and connectors feature precision pre-drilled holes that align with corresponding holes pre-drilled along the full length of all SHAPESCAPER® edging.

A choice of holes along each length allow for either the recommended x3 stakes per length or x4 stakes per length for specific applications, such as long straight runs of edging in light soils or heavy traffic areas.

Lower profile stakes such as the 400mm long ribbed stake offer a choice of fastening heights that can be varied depending on the profile of the edging being installed along with the required fastener depth.

Stakes can be installed by matching up the corresponding holes in the edging and then secured by screwing in from the front. Alternatively stakes can be installed by screwing them in through a pre-drilled stake hole into any part of the edging along the back face.

It is important to check that all screwed fittings are placed well under the soil level and will not cause an injury while weeding etc. All fastening above soil level should be fitted off using the supplied rivets.

## STAKES

# SHAPESCAPER® pre-made edging corners

Manufactured in Australia with BlueScope® Steel

Corner lengths are supplied complete with connector plates and screws. Pre-drilled holes make assembly and alignment easy. SHAPESCAPER® pre-made corners are available in taller profile heights.

While the 75mm, 100mm, 150mm and 185mm can easily be shaped on site to form 90° bends, the higher profiles require either the use of our custom bending service or our pre-made corners.

## SHAPESCAPER® modular steel landscaping

Manufactured in Australia with BlueScope® Steel

SHAPESCAPER® planters feature a modular design that create extremely durable and attractive REDCOR® weathering steel planters suitable for both domestic and commercial installation.

The design incorporates smooth rounded edges and a top 40mm x 20mm return rim for added strength and safety. Planters are supplied in two halves that are easily joined. They can also be combined with a range of extender lengths to create your own custom designs. Pre-drilled alignment holes make assembly very quick and easy. Planters come in either a 500mm or 700mm profile height. Custom bases and feet are also available.

# SHAPESCAPER® modular steel landscaping

Manufactured in Australia with BlueScope® Steel

The SHAPESCAPER® Hexagon and Box planters can both be easily customised on site to fit a wide range of designs simply by using the extensions pieces listed below. Straight length extenders and 90° corners are typically used to modify box planters while the 60° corners are commonly used to modify hexagon planters. The planter system is however completely modular, being totally interchangeable across the range, even when joining the 500mm and 700mm profiles.
