

Limestone

Information and Features

Tumbled Limestone will give you that natural, soft and aged feel that no other product can deliver. The pavers are cut from limestone deposits that have formed over millions of years, the pavers are then tumbled to give them an aged and informal look.

- Slip Resistant (P5)
- Split and Tumbled
- Natural and Unique
- Calibrated Underneath

Suitability

- Outdoor Entertaining areas
- Pathways and Stepping Stones
- Pool Surrounds
- Driveways *

*If engineered correctly - 30mm thickness only

Colours

Black Limestone

Natural Limestone

*Colours are indicative only

600x400x30mm*

Copings

400x40x30mm – Bullnose *

Stepping Stones

450x450x30mm

Random Rock

6 random sizes 350-450mm

30mm Thick

Long Format Pavers

710x230x40mm

*Available in Black Limestone Only

PLEASE READ PRIOR TO PURCHASE - Material Consideration - Due to the nature of natural stone, it is expected that products will vary in appearance, colour, texture, grain, shape, size and markings. No two pavers or tiles will be the same, and that is what provides the beauty of natural stone products. It is a good idea to blend tiles / pavers from all crates prior to laying. Products have an acceptable size tolerance of up to +/- 2.5mm, so it is important to arrange pavers by thickness and incorporate a grout space when laying. Small amounts of chipping as well as natural marks are considered acceptable in natural stone products. It is the responsibility of the user to inspect the tiles / pavers prior to laying as claims will not be honoured after products have been installed. Excessive chipping, cracks or size variation may be eligible for claim. We recommend sealing all pavers and tiles.
