

TUFFPOLY™

STRUCTURAL COMPOSITE RETAINING SYSTEM

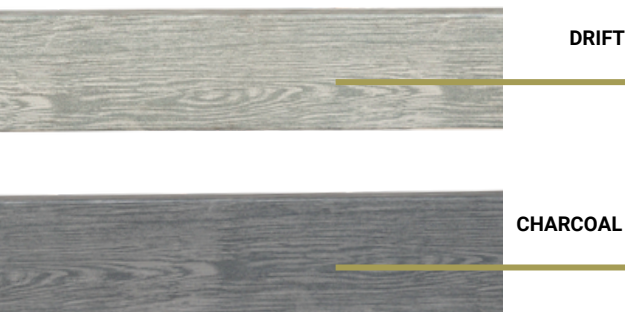

Building structural retaining walls has never been this convenient, cost-effective and easy. Welcome to a new era of structural landscaping where you can enjoy the timeless beauty of timber, the strength of concrete and steel yet being almost 10x lighter to install!

With **TUFFPOLY**, your new retaining wall will not only look stunning but will also be quicker and easier to install, saving you valuable time, money and your back from heavy lifting. Unlike concrete and steel options, our sleeper and posts require no heavy-lifting machinery. This means they can be installed by anyone, even on challenging sites that are hard to reach.

TUFFPOLY is 100% Australian owned and all our products are designed & engineered right here to ensure they comply with all relevant Australian Standards. Our retaining wall system is super strong and built to perform in the toughest conditions, we guarantee it!

WHY USE TUFFPOLY?

LIGHT	Up to 10x lighter than concrete sleepers. No heavy-lifting machinery is needed. Sleepers weigh less than 10kg each!
STRONG	Structural composite, designed and engineered to replace timber and some concrete & steel alternatives
DURABLE	Use anywhere and everywhere, even in highly corrosive coastal locations. Ultra protection against moisture, U.V. and mould
PRICE	The most cost-effective structural composite retaining system on the market
LESS LABOUR	Up to 75% labour savings during the installation of sleepers
ZERO RUST OR ROT	Will never rust or rot – EVER!
GREAT LOOK	Natural timber look sleepers & posts in 2 on-trend colours
VERSATILE	Clever design allows C Posts to double as a capping
ENGINEERED	100% Designed and engineered in Australia
COMPLIANT	Exceeds AS 4678:2002 - Earth Retaining Structures
SUSTAINABLE	Low heat and energy manufacturing = Lower Carbon Emissions
DISTRIBUTION	Innovative design equals more products delivered for less
